

ToLEDo T8 Tubes

Best cost saving potential

The new **ToLEDo T8 Tube** is the perfect retrofit to existing linear fluorescent tubes operating on magnetic ballast, with the added benefit of not having to apply any change to the luminaire. The range provides a convenient solution for difficult to access luminaires with long operating hours while reducing energy consumption. The ToLEDo tubes are the best lighting solution for industrial lighting applications such as warehouses, car parks, transport facilities and linear indoor applications such as supermarkets or cold storage areas.

Upgrading to the latest LED technology, users will benefit from a long life of up to 30,000 hours, allowing users to achieve savings on maintenance and consuming less energy will benefit with up to 50% savings in energy costs.

The new **ToLEDo T8 Tube** range is available in 4000K Cool white in a range of lengths to meet customer needs. They also deliver a high CRI of 80 and with a satin finish provides an excellent light quality minimising glare and directing light downwards avoiding reflector losses and maximising light output.

ToLEDo T8 Tubes

Best cost saving potential

FEATURES:

- Great value for money
- Retrofit for T8 lamps, easy plug and play solution for magnetic ballast systems
- Low power consumption to maximise energy saving potential
- 30000 Hours life - reduced maintenance costs
- Lumen output up to 2700lm with high efficacy up to 90lm/W
- High colour rendering - CRI >80 with high efficacy up to 90lm/W
- Instant light - Ideal for use on PIR enabling even greater energy savings
- Highly robust construction
- High power factor 0.95
- 3 Year warranty

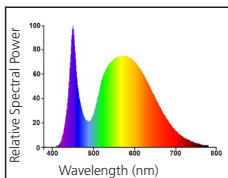

*When compared to linear fluorescent on magnetic ballast

Instructions for magnetic ballast

Remove existing starter and replace with the starter provided with the lamp

Not suitable for use on emergency or tandem ballast applications
